EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Bunker on March 17, 2005.

The application has been amended as follows:

1. Claim 24 is replaced by the following claim:

A method of nonverbal communication between a patient and a caregiver, the method comprising:

removably securing a laser to an article worn by the patient, the laser being coupled to a power supply and an on/off switch,

providing a plurality of charts at a location remote from, but within view of the patient, each chart comprising a plurality of both alphanumeric and graphical images permanently printed thereon, wherein the charts do not require electrical power to retain the images, wherein the graphical images are selected to represent at least one concept selected from the group consisting of: pain, discomfort, emotion, personal grooming requests and information relating to a medical condition of the patient, wherein the images are grouped according to said concept, and wherein a plurality of images indicating related concepts are located adjacent one another on the chart;

placing the charts within view of both the patient and the caregiver;

activating the laser by operating the switch;

selecting a first chart and a first image and aiming a laser beam emitted from said laser at the first image on the first chart, thereby causing a visible laser image to impinge on the chart on or adjacent to the first image;

selecting a second image on the first chart and aiming the laser beam at the second image, thereby causing a visible laser image to impinge on the chart on or adjacent to the second image;

allowing the caregiver to view the chart, the first image and the second image illuminated by the patient,

wherein a sequence of selecting the first image and the second image facilitates communication of a concept to the caregiver.

2. Claim 25 is cancelled.
3. In claim 26, line 1, replace – 25 – with “24”.
4. Replace title with “Nonverbal Communication Device and Method.”

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a method of nonverbal communication between a patient and a caregiver using a laser device attached to the patient, in which the user points to a first image followed by a second image on a chart displaying images detailing concepts a patient wishes to communicate, said chart within the view of a caregiver, the two images used to communicate a concept from the patient to the caregiver.
